Reporting Update 9

Purpose

Enhance visibility of key metadata for FCP Funding and Payment Accounts

System

Vitesse Merchant Administration System (MAS)

Overview

The **FCP Account Metadata feature** is introduced to improve visibility into metadata associated with Payment and Funding Accounts. It surfaces key market specific fields captured during the account setup process, making them accessible through MAS and included in certain reports. This information is available to be exported from MAS in CSV or PDF format.

Key Benefits

- **Integrated Access to Resources:** Direct links to LIMOSS reduces the navigation time and improves the ability of our users to self-service.
- **Improved Data Visibility:** Users can access metadata directly via MAS and reports.
- **Enhanced Reporting:** Users can better manage their accounts by including key data in reports.

Accessing FCP Properties

1. Login to MAS
2. Select Accounts
3. Select the relevant FCP Payment or Funding Account
4. Select the FCP Properties tab
